☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
for the fiscal year ended September 30, 2021

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File No. 0-14665
DAILY JOURNAL CORPORATION
(Exact name of registrant as specified in its charter)

South Carolina
(State or other jurisdiction of
incorporation or organization)
915 East First Street
Los Angeles, California
(Address of principal executive offices)

95-4133299
(IRS Employer
Identification No.)

90012
(Zip Code)

Registrant's telephone number, including area code: (213) 229-5300

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock	DJCO	The Nasdaq Stock Market

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically, every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

(Check one):

Large accelerated filer ☐
Non-accelerated filer ☐
Emerging growth company ☐

Accelerated filer ☐
Smaller reporting company ☒

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act):
Yes ☐ No ☒

As of March 31, 2021, the aggregate market value of Daily Journal Corporation's voting stock held by non-affiliates was approximately \$379,566,000.

As of November 30, 2021, there were outstanding 1,380,746 shares of Common Stock.

Disclosure Regarding Forward-Looking Statements

This Annual Report on Form 10-K includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Certain statements contained in this document, including but not limited to those in “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” are “forward-looking” statements that involve risks and uncertainties that may cause actual future events or results to differ materially from those described in the forward-looking statements. Words such as “expects,” “intends,” “anticipates,” “should,” “believes,” “will,” “plans,” “estimates,” “may,” variations of such words and similar expressions are intended to identify such forward-looking statements. We disclaim any intention or obligation to revise any forward-looking statements whether as a result of new information, future developments, or otherwise. There are many factors that could cause actual results to differ materially from those contained in the forward-looking statements. These factors include, among others: risks associated with software development and implementation efforts; Journal Technologies’ reliance on professional services engagements with justice agencies; material changes in the costs of postage and paper; possible changes in the law, particularly changes limiting or eliminating the requirements for public notice advertising; possible loss of the adjudicated status of the Company’s newspapers and their legal authority to publish public notice advertising; the impacts of COVID-19 and the efforts to contain it on the Company’s customers, advertisers and subscribers, particularly the closure or scaling back of operations of courts, justice agencies and other businesses; a further decline in subscriber and commercial advertising revenues; possible security breaches of the Company’s software or websites; the Company’s reliance on its president and chief executive officer, who has reduced his work schedule due to a health issue; changes in accounting guidance; material weaknesses in the Company’s internal control over financial reporting; and declines in the market prices of the securities owned by the Company. In addition, such statements could be affected by general industry and market conditions, general economic conditions (particularly in California) and other factors. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct. Important factors that could cause actual results to differ materially from those in the forward-looking statements are discussed in this Form 10-K, including in conjunction with the forward-looking statements themselves. Additional information concerning factors that could cause actual results to differ materially from those in the forward-looking statements is contained from time to time in documents filed by the Company with the Securities and Exchange Commission.

PART I

Item 1. Business

Daily Journal Corporation (the "Company") publishes newspapers and websites reporting California and Arizona news and produces several specialized information services. It also serves as a newspaper representative specializing in public notice advertising. This is sometimes referred to as the Company's "Traditional Business".

Journal Technologies, Inc. ("Journal Technologies"), a wholly-owned subsidiary of the Company, supplies case management software systems and related products to courts, prosecutor and public defender offices, probation departments and other justice agencies, including administrative law organizations, city and county governments and bar associations. These organizations use the Journal Technologies family of products to help manage cases and information electronically, to interface with other critical justice partners and to extend electronic services to the public, including efilings and a website to pay traffic citations and fees online. These products are licensed in 42 states and internationally.

Essentially all of the Company's U.S. operations are based in California, Arizona and Utah. The Company also has a presence in Australia where Journal Technologies is working on three software installation projects. Financial information of the Company, including information about each of the Company's reportable segments, is set forth in Item 8 ("Financial Statements and Supplementary Data").

Products and Services

The Traditional Business

Newspapers and related online publications. The Company publishes 10 newspapers of general circulation. Each newspaper, in addition to news of interest to the general public, has a particular area of in-depth focus for its news coverage, attracting readers interested in obtaining specific information through a newspaper format.

The publications are based in the following cities:

Newspaper publications

Los Angeles Daily Journal
San Francisco Daily Journal
Daily Commerce
The Daily Recorder
The Inter-City Express
San Jose Post-Record
Orange County Reporter
The Daily Transcript
Business Journal
The Record Reporter

Base of publication

Los Angeles, California
San Francisco, California
Los Angeles, California
Sacramento, California
Oakland, California
San Jose, California
Santa Ana, California
San Diego, California
Riverside, California
Phoenix, Arizona

The Daily Journals. The Los Angeles Daily Journal and the San Francisco Daily Journal (together, "The Daily Journals") are each published every weekday except certain holidays and were established in 1888 and 1893, respectively. In addition to covering state and local news of general interest, these newspapers focus on law and its impact on society. Generally, The Daily Journals seek to be of special use to lawyers and judges.

The Daily Journals share much content. The Los Angeles Daily Journal is the largest newspaper published by the Company, both in terms of revenues and circulation. At September 30, 2021, the Los Angeles Daily Journal had approximately 3,600 paid subscribers and the San Francisco Daily Journal had approximately 2,100 paid subscribers as compared with total paid subscriptions for both of The Daily Journals of 6,300 at September 30, 2020. The Daily Journals carry commercial advertising (display and classified) and public notice advertising required or permitted by law to be published in a newspaper of general circulation. The main source of commercial advertising revenue has been law firms and businesses wishing to reach the legal professional community. The gross revenues generated directly by The Daily Journals are attributable approximately 59% to subscriptions and 41% to the sale of advertising and other revenues. Revenues from The Daily Journals constituted approximately --14% of the Company's total revenues in both fiscal 2021 and 2020.

The Daily Journals include the Daily Appellate Report, providing full text and case summaries of all opinions certified for publication by the California Supreme Court, the California Courts of Appeal, the U.S. Supreme Court, the U.S. Court of Appeals for the Ninth Circuit and the U.S. Bankruptcy Appellate Panel for the Ninth Circuit. The Daily Journals also include a monthly court directory in booklet form. This directory includes a comprehensive list of sitting judges in all California courts as well as courtroom assignments, phone numbers and courthouse addresses, plus "Judicial Transitions" which lists judicial appointments, elevations, confirmations, resignations, retirements and deaths.

The Daily Journals are distributed by mail and hand delivery. The regular yearly subscription rate for each of The Daily Journals is \$870 plus tax.

Most of the information published in The Daily Journals is available to subscribers online at www.dailyjournal.com.

Daily Commerce. Published since 1917, the Daily Commerce is based in Los Angeles and covers news of general interest, columns of interest to real estate investors and brokers, and information on distressed properties in Los Angeles County. The nature of the news coverage enhances the effectiveness of public notice advertising by distributing information about foreclosures to potential buyers. Features include default listings and probate sale notices. The Daily Commerce carries both public notice and commercial advertising. It is published each business day. A subscription includes online access to the Los Angeles County foreclosure listing and public record database.

The Daily Recorder. The Daily Recorder, based in Sacramento, began operations in 1911. It is published each business day. In addition to general news items, it includes legal news and columns of interest to the Sacramento legal and real estate communities. It includes the Daily Appellate Report and carries commercial and public notice advertising. A subscription includes online access to the Sacramento County foreclosure listing and public record database.

The Inter-City Express. The Inter-City Express (the "Express") has been published since 1909. It covers general news of local interest and focuses its coverage on news about the real estate and legal communities in the Oakland/San Francisco area. The Express carries public notice advertising and is published each business day. A subscription includes online access to the Alameda County foreclosure listing and public record database.

San Jose Post-Record. The San Jose Post-Record (the "Post-Record") has been published since 1910. In addition to general news of local interest, the Post-Record focuses on legal and real estate news. It is published every business day and carries public notice advertising. A subscription includes online access to the Santa Clara County foreclosure listing and public record database.

Orange County Reporter. The Orange County Reporter ("Reporter") has been an adjudicated newspaper of general circulation since 1922. In addition to general news of local interest, the Reporter publishes local and state legal, business and real estate news, and carries public notice advertising. The Reporter is published three days a week. A subscription includes online access to the Orange County foreclosure listing and public record database.

The Daily Transcript. The Daily Transcript is based in San Diego and published each business day. It reports general news items and San Diego commercial real estate, business and construction news. It has been an adjudicated newspaper of general circulation since 1909. It carries commercial and public notice advertising. A subscription includes online access to the San Diego County foreclosure listing and public record database.

Business Journal. The Business Journal, established in 1991, publishes news of general interest and provides coverage of the business and professional communities in Riverside County. It also carries public notice advertising and is published each business day. The subscription includes online access to the Riverside/San Bernardino County foreclosure listing and public record database.

The Record Reporter (Arizona). The Record Reporter has been in existence since 1914. In addition to general news of local interest, The Record Reporter, which is published three days a week, focuses on legal news and public record information and carries primarily public notice advertising. The subscription includes online access to the Maricopa and Pinal County public record database.

Information Services. The specialized information services offered by the Company have grown out of its newspaper operations or have evolved in response to requests of its newspaper subscribers.

The Company has several court rules services, including multi-volume, loose-leaf sets for certain state and federal courts in California. The Northern California set consists of nine volumes. The Southern California set has eight volumes. The Company updates these court rules on a monthly basis. In addition, the Company publishes single-volume rules for (1) Los Angeles County; (2) Orange County; (3) San Diego County; (4) the Ninth Circuit and the Central District of California. The single volumes are replaced when there are rule changes.

The Judicial Profiles service contains information concerning nearly all active judges in California. The Judicial Profiles include an interview-based article previously published in The Daily Journals, biographical data and information supplied by participating judges on courtroom procedures and policies. Subscribers may purchase the ten-volume set for Southern California, the eight-volume set for Northern California or individual profiles online.

Advertising and Newspaper Representative. The Company's publications carry commercial advertising and public notice advertising. Commercial advertising consists of display and classified advertising and constituted about 4% of the Company's total operating revenues in both fiscal 2021 in 2020. Classified advertising revenues have continued to decline primarily due to online competition.

Public notice advertising consists of many different types of legal notices required by law to be published in an adjudicated newspaper of general circulation, including notices of death, fictitious business names, trustee sale notices and notices of governmental hearings. The major types of public notice advertisers are real estate-related businesses and trustees, governmental agencies, attorneys, and businesses or individuals filing fictitious business name statements. Many government agencies use the Company's Internet-based advertising system to produce and send their notices to the Company for publication. A fictitious business name website enables individuals to send their statements to the Company for filing and publication, and another website enables attorneys and individuals to send probate, civil, corporate, public sale and other types of public notices to the Company. California Newspaper Service Bureau ("CNSB"), a division of the Company, is a statewide newspaper representative (commission-earning selling agent) specializing since 1934 in public notice advertising. CNSB places public notices and other forms of advertising with adjudicated newspapers of general circulation, most of which are not owned by the Company, and produces a legal advertising page for some other newspapers.

Public notice advertising revenues and related advertising and other service fees, including trustee sales legal advertising revenues, constituted about --17% of the Company's total operating revenues in fiscal 2021 and 15% in 2020. Most of these revenues were generated by (i) notices published in the Company's newspapers, (ii) commissions and similar fees received from other publications in which the advertising was placed, and (iii) service fees to file notices with government agencies.

For several years, trustee sales legal advertising revenues were driven by the large number of foreclosures in California and Arizona, for which public notice advertising is required by law. Recently, however, there have been far fewer foreclosures, and trustee sales legal advertising revenues represented only about 1% of the Company's total operating revenues in both fiscal 2021 and 2020.

Other revenues are attributable to service fees from users of an online foreclosure/fictitious business name databases, fees from attorneys taking continuing legal education tests published in The Daily Journals and online, and other miscellaneous fees including reprint services of articles published in The Daily Journals.

Journal Technologies

Journal Technologies provides case management software and related services to courts and other justice agencies. Its operations constituted about 70% of the Company's total operating revenues in fiscal 2021 and 71% in 2020. Journal Technologies earns revenue from license, maintenance and support fees paid by customers to use its software products; consulting fees paid by customers for installation, implementation and training services; and fees generated by the use of secure websites through which the general public can pay traffic citations and e-file cases. Journal Technologies has the following main "eSeries" products:

eCourt®, eProsecutor™, eDefender™ and eProbation™ — browser-based case processing systems that can be used by courts and other justice agencies for all case types because the screens, data elements, business rules, work queues, searches and alerts are highly configurable.

eFile™ — a browser-based interface that allows attorneys and the general public to electronically file documents with the court.

ePayIt™ — a service primarily for the online payment of traffic citations. Users can pay traffic citations by credit card, and get information on traffic school.

Almost all of Journal Technologies' customers are government agencies, and most new software installation and licensing projects are subject to competitive bidding procedures. Accordingly, the ability of Journal Technologies to get new customers is highly unpredictable. In addition, budget constraints, especially during stressful economic times, could force governmental agencies to defer or forgo consulting services or even to stop paying their annual software maintenance fees. As a technology-based company, Journal Technologies' success depends on the continued improvement of its products, which is why the costs to update and upgrade them consistently constitute such a significant portion of the Company's expenses.

The Company's revenues from Journal Technologies' foreign customers were \$2,055,000 in fiscal 2021 and \$1,687,000 in 2020. All of the Company's other revenues in those years were attributable to the United States.

Materials and Postage

After personnel costs (included in "Salaries and employee benefits" and in "Outside services" in the accompanying consolidated statements of comprehensive income), postage and paper costs are typically the next two largest expenses for The Traditional Business. Paper and postage accounted for approximately 5% of our traditional publishing segment's operating costs in fiscal 2021 and 4% in fiscal 2020.

An adequate supply of newsprint and other paper is important to the Company's operations. The Company currently does not have a contract with any paper supplier. The Company has always been able to obtain sufficient newsprint for its operations, although past shortages of newsprint have sometimes resulted in higher prices. The price of newsprint increased by 7% toward the end of fiscal 2021.

We use the U.S. Postal Service for distribution of roughly 45% of our newspapers. During the past several years, the Company has instituted changes in an attempt to mitigate higher postage costs. These changes have included contracting for hand delivery in selected sections of the San Francisco Bay area and in Santa Clara, Alameda, San Diego, Riverside, San Bernardino, Orange and Los Angeles counties, delivering pre-sorted newspapers to the post office on pallets, which facilitates delivery and improves service, and bundling newspapers to reduce per-piece charges. In addition, the Company has an ink jet labeler which eliminates paper labels and enables the Company to receive bar code discounts from the postal service on some of its newspapers.

Postal rates are dependent on the operating efficiency of the U.S. Postal Service and on legislative mandates imposed upon the U.S. Postal Service. During the past several years, the U.S. Postal Service has increased postal rates. During fiscal 2021, postage increased by \$23,000 (6%) to \$436,000 from \$413,000.

Marketing

The Company actively promotes its individual newspapers and its multiple newspaper network as well as its other publications. The specialization of each publication creates both target subscribers and target advertisers. Subscribers are likely to be attracted because of the nature of the information carried by the particular publication, and likely advertisers are those interested in reaching such consumer groups. In marketing products, the Company also focuses on its ancillary products which can be of service to subscribers, such as its specialized information services.

The Company receives, on a non-exclusive basis, public notice advertising from a number of service providers. Such agencies ordinarily receive a commission of 15% to 25% on their sales of advertising in Company and other publications. Commercial advertising agencies also place advertising in Company publications and receive commissions for advertising sales.

Journal Technologies' staff includes employees who provide marketing and consulting services which may also result in additional consulting projects and the licensing of products. Most of Journal Technologies' new projects come from a competitive bidding process.

Competition

Competition for readers and advertisers is very intense, both by established publications and by new entries into the market. The Daily Journals face aggressive competition in Los Angeles and San Francisco. All of the Company's publications and products face strong competition from other publications and service companies. Readers of specialized newspapers focus on the amount and quality of general and specialized news, amount and type of advertising, timely delivery and price. The Company designs its newspapers to fill niches in the news marketplace that are not covered as well by major metropolitan dailies. The in-depth news coverage which the Company's newspapers provide, along with general news coverage, attracts readers who, for personal or professional reasons, desire to keep abreast of topics to which a major newspaper cannot devote significant news space. Other newspapers do provide some of the same subject coverage as does the Company, but the Company believes its coverage, particularly that of The Daily Journals, is more complete. The Company believes that The Daily Journals are the most important newspapers serving California lawyers on a daily basis.

The Company's court rules publications face competition from case management systems and the courts themselves. Subscriptions to the single and multi-volume court rules continued to decline during fiscal 2021. The Company's Judicial Profile services have indirect competition because some of the same information is available through other sources, including the courts.

The steady decline in recent years in the number of subscriptions to The Daily Journals and court rule publications is likely to continue and will certainly impact the Company's future revenues.

In attracting commercial advertisers, the Company competes with other newspapers and magazines, television, radio and other media, including electronic and online systems for employment-related classified advertising. Factors which may affect competition for advertisers are the cost for such advertising compared with other media, and the size and characteristics of the readership of the Company's publications. Internet sites devoted to personnel recruitment have become significant competitors of our newspapers and websites for classified advertising.

In addition, there has been a steady consolidation of companies serving the legal marketplace, resulting in an ever-smaller group of companies placing display advertising. Consequently, retaining advertising revenues remains a challenge. To reduce costs, the Company has contracted with an outside advertising agency to conduct sales of its display advertising.

The Company competes with at least one serious competitor for public notice advertising revenue in each of its markets. Large metropolitan general interest newspapers normally do not carry a significant amount of legal advertising, although recently they too have solicited certain types of public notice advertising. CNSB, the Company's commission-earning selling agent, faces competition from a number of companies based in California, some of which specialize in placing certain types of notices.

There is significant competition among a limited number of companies to provide services and software to the courts and other justice agencies, and some of these companies are much larger and have greater access to capital and other resources than Journal Technologies. Others provide services for a limited number of customers. As part of the competitive bidding process, many customers will express a preference for, or even require, larger vendors.

Many customers desire Internet-based solutions to centralize operations, facilitate electronic filing, interface with other justice partners and the public, and publish certain information from case management systems. Journal Technologies' product lines provide versions of these services, but there are many uncertainties in the process of courts and other agencies migrating to newer Internet-based systems, including whether Journal Technologies' versions of case management systems will find general acceptance and whether the update, upgrade and modification of such systems can be done in a cost-effective manner. The Company competes on a variety of factors, including price, technological capabilities and services to accommodate the individual requirements of each customer.

Employees

The Company had approximately 290 full-time employees and contractors and about 10 part-time employees as of September 30, 2021, including about 200 full-time employees and contractors at Journal Technologies. The Company is not a party to any collective bargaining agreements. Certain benefits, including medical insurance, are provided to all full-time employees. Management considers its employee relations to be good.

Working Capital

Traditionally, the Company had generated sufficient cash flow from operations to cover all its needs without significant borrowing. The Company owns marketable securities with dividends and significant appreciation, providing the Company with additional working capital, subject, of course, to the normal risks associated with owning securities. To a considerable extent, the Company also benefits from the fact that subscriptions and some licenses, maintenance, customer support and some are paid in advance. In fiscal 2013, the Company borrowed \$14 million from its investment margin account to purchase all of the outstanding stock of New Dawn Technologies, Inc. ("New Dawn"), and another \$15.5 million to acquire substantially all of the operating assets and liabilities of ISD Technologies, Inc. ("ISD"), in each case pledging its marketable securities to obtain favorable financing.

The Company believes it has sufficient cash and marketable securities for the foreseeable future. If the Company's overall cash needs exceed cash flow and its current working capital, the Company may still have the ability to borrow against its marketable securities on favorable terms, or it may attempt to secure additional financing which may or may not be available on acceptable terms.

The Company extends unsecured credit to most of its advertising customers and some government agencies. The Company maintains a reserve account for estimated losses resulting from the inability of these customers to make required payments, but if the financial conditions of these customers were to deteriorate or the Company's judgments about their abilities to pay are incorrect, additional allowances might be required, and the Company's cash flows and results of operations could be materially affected.

Inflation

The effects of inflation are not significantly any more or less adverse on the Company's businesses than they are on other publishing and software companies. The Company has experienced the effects of inflation primarily through increases in costs of personnel. These costs have generally been offset by increased license, maintenance and support fees, which often contain a periodic cost-of-living adjustment.

Access to Our Information

The Company files annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission ("SEC"). These filings are not available on our website, www.dailyjournal.com, which is generally dedicated to the content of our publications and services. We will, however, provide these filings in electronic or paper format free of charge upon request addressed to our Secretary at our principal executive offices. Our SEC filings are also available to the public over the Internet at the SEC's website at www.sec.gov.

Item 1A. Risk Factors

The foregoing business discussion and the other information included in this Form 10-K should be read in conjunction with the following risks, trends and uncertainties, any of which, either individually or in the aggregate, could materially and adversely affect our business, operating results or financial condition.

Risks Associated with Coronavirus (COVID-19) Pandemic

The Company's business is likely to be materially and adversely affected by an epidemic or pandemic such as COVID-19, or by a similar event or the fear of such an event, and the measures that governmental authorities implement to address it.

As COVID-19 began to spread in March and April 2020, and again more recently, governmental authorities and health officials implemented numerous unprecedented measures to contain the virus, including "stay at home" orders for non-essential workers, travel restrictions, quarantines and business shutdowns. Most of Journal Technologies' customers, which are primarily courts and governmental agencies in the United States, Canada and Australia, either closed or significantly scaled back their activities. Similarly, many law firms and companies from which the Traditional Business derives advertising and subscription revenues also curtailed their operations and spending.

The impact on economic activity of these actions or similar actions in the future are likely to significantly impact the Traditional Business' advertising and subscription revenues. The trend of working from home and using on-line services is also likely to put additional pressure on the newspaper business by impacting circulation numbers that may not be replaced by on-line revenues. Actions restricting travel, requiring non-essential workers to "stay at home" or causing courts and justice agencies to close or cut back operations can impact the ability of Journal Technologies to complete certain projects that are typically done in-person (and for which payment is usually received upon completion), reduce e-filing revenues, affect procurement processes and result in overall payment delays. In addition, the Company relies on its portfolio of marketable securities for dividend income and balance sheet support, and the value of the portfolio can be materially affected by declines in stock prices, particularly among the common stocks of the three U.S. financial institutions and one foreign manufacturer that make up a substantial portion of the portfolio.

Due to the uncertainties associated with the duration and severity of an event like COVID-19, the efforts to contain it, and the changes in business operations and personal behaviors that are likely to follow from it, it is difficult to estimate the magnitude of its impact on the Company's business in future periods, but it could materially affect the Company's operations, staffing levels, financial condition, liquidity and cash flows going forward. Also, while the vast majority of the Company's employees are currently working from home effectively, a resurgence in serious COVID-19 infections could cause the Company to experience a lack of availability of employees to perform key job functions at particular points in time.

Risks Associated with the Traditional Business

Changes in the legal requirement to publish public notice advertising or in the legal ability of our newspapers to publish those notices would have a significant adverse impact on The Traditional Business.

From time to time, the legislatures in California and Arizona (and elsewhere) have considered various proposals that would result in the elimination or reduction of the amount of public notice advertising in printed newspapers required by statute, and Arizona approved one such proposal for a particular notice type in fiscal 2017. These proposals typically focus on the availability of alternative means of providing public notices, such as via the Internet. Some proposals also question the need for public notices at all. To the extent these proposals become law, particularly in California and Arizona, they could materially affect the revenues of The Traditional Business.

In addition, if the adjudication, which is what gives publishers the legal ability to publish public notice advertising, of one or more of the Company's newspapers were challenged and revoked, those newspapers would no longer be eligible to publish public notice advertising, and it could materially affect the revenues of The Traditional Business.

The Traditional Business faces strong competition in each of its markets.

Competition for readers and advertisers is very intense, both from established publications and from new entrants into the market. The Daily Journals face aggressive competition. The Company's court rules publications face competition in both Northern and Southern California from document management programs, online court rules services, and the courts themselves. The steady decline in recent years in the number of subscriptions to The Daily Journals and the court rule publications is likely to continue and adversely impact The Traditional Business' future revenues.

The Traditional Business also competes with serious competitors for public notice advertising in all of its markets. As the amount of this advertising has decreased due to the reduction in the number of foreclosures discussed above, the competition to publish the remaining public notices has intensified and may result in a further decline in The Traditional Business' public notice advertising revenues.

The Traditional Business continues to experience challenges in maintaining its commercial advertising and circulation revenues, particularly due to the growth of Internet sites.

Internet sites devoted to recruitment have become significant competitors of our newspapers and websites for classified advertising. In addition, there has been a steady consolidation of companies serving the legal marketplace, resulting in an ever-smaller group of companies placing display advertising. Furthermore, newspapers like ours have been struggling to compete for display advertising generally, given the many other forums (including Internet sites) that compete for advertising dollars. These trends are expected to continue and would adversely affect The Traditional Business. The Company has contracted with a third-party agency to sell display advertising for the Company.

Circulation revenues have continued to decline as more and more information has become available online. Law firm mergers have also reduced the number of firms that purchase multiple subscriptions of our newspapers. It is not practical to assume that we will be able to offset the decline in subscriptions with increases in the subscription rate, and we expect that our circulation revenues will continue to decline.

The Traditional Business is exposed to risks associated with fluctuations in postage and paper costs.

After personnel costs, postage and paper costs are typically the Company's next two largest expenses. An adequate supply of newsprint and other paper is important to the operations of The Traditional Business. The Company currently does not have a contract with any paper supplier, and in the past, shortages of newsprint have sometimes resulted in higher prices. Recently, there have been consolidations of newsprint suppliers, and paper prices may fluctuate substantially in the future.

The Traditional Business uses the U.S. Postal Service for distribution of a majority of its newspapers and products. Postal rates are dependent on the operating efficiency of the U.S. Postal Service and on legislative mandates imposed upon the U.S. Postal Service. During the past several years, postal rates have increased. Postal rates and fees may increase more in the future. Further, we may not be able to pass on increases in paper and postage costs to our customers.

Risks Associated with Journal Technologies

The success of Journal Technologies depends in large part on the technological update and upgrade of its software products.

Journal Technologies' success depends on the continued improvement of its products, and the costs to update and upgrade those products consistently represent a large portion of Journal Technologies' expenses. There are many uncertainties in the process of courts and other justice agencies migrating to newer case management systems, including whether Journal Technologies' versions of these systems will find general acceptance and whether the modification of such systems can be done in a cost effective manner. The costs to update and upgrade Journal Technologies' products are expensed as incurred and will impact earnings at least through the foreseeable future.

Journal Technologies faces significant competition from other case management software vendors.

There is significant competition among a limited number of companies to provide services and software to courts and other justice agencies, and some of these companies are much larger and have greater access to capital and other resources than Journal Technologies. Normally, the vendor is selected through a bidding process, and often the customers will express a preference for, or even require, larger vendors. An inability to successfully compete in this difficult market could materially affect the earnings of Journal Technologies.

The customers of Journal Technologies are public sector entities, which create special issues and risks.

Almost all of the customers of Journal Technologies are courts, justice agencies, and other government entities. Accordingly, we face special risks associated with governmental budget constraints, especially during stressful economic times, which could force government entities to defer or forego consulting services or even stop paying their annual software license and maintenance fees. In addition, we encounter risks related to a longer and more complicated sales cycle than exists for commercial customers, political issues related to resource allocation, administration turnover and preferences for internal case management solutions or for a particular vendor, complicated bidding procedures, and fluctuations in the demand for information technology products and services.

Journal Technologies generally recognizes revenues for software installations only upon completion of the applicable services and customer acceptance of the software system.

In most cases, installation fees are not due until the customer has indicated its satisfaction with the installed system, and it has "gone live". Accordingly, we do not recognize revenues for installation services or for most other consulting services until after the services have been performed and accepted. There are significant risks associated with our ability to complete our services to the satisfaction of our customers and to fulfill the requirements that entitle us to be paid. An inability to realize payment for services performed could materially affect the earnings of Journal Technologies.

Risks Associated with Our Holdings of Marketable Securities

A large portion of the Company's assets is held in publicly traded securities, and the prices of those securities may decline.

As of September 30, 2021, the Company held marketable securities worth approximately \$347,573,000, with an unrealized gain for financial statement purposes of \$244,093,000. While this portfolio has enabled the Company to borrow on very favorable terms for acquisitions and to better compete for case management software opportunities that are usually limited to "large" firms, it is unusual for a public company to invest a significant amount of its available cash in the marketable securities of other public companies. The value of these securities could decline, which would adversely affect net income and shareholders' equity.

Also, as of September 30, 2021, the Company's holdings of marketable securities were concentrated in just seven companies. Accordingly, a significant decline in the market value of one or more of the Company's holdings may not be offset by hypothetically better performance of other holdings. This concentration of risk may result in a more pronounced effect on net income and shareholders' equity.

The Company is required to recognize losses in a particular security for financial statement purposes even though the Company has not actually sold the security.

Under accounting rules that became effective in fiscal 2019, changes in the unrealized gains and losses on marketable securities are included in the Company's reported net income (loss), even though the Company has not actually realized any gain or loss by selling such marketable securities. Accordingly, changes in the market prices of the Company's marketable securities can have a significant impact on the Company's reported results for a particular period, even though those changes do not bear on the performance of the Company's operating businesses.

The Company may be subject to fluctuations in foreign currency rates for marketable securities that are not denominated in the United States Dollar.

At times, the Company may hold marketable securities denominated in currencies other than the United States Dollar. When it does, the Company may be at risk for significant fluctuations in the applicable foreign currency exchange rates, which would affect the profitability of such marketable securities. The Company currently owns one such investment that is denominated in Hong Kong Dollar.

General Corporate Risks

The Company relies heavily on the services of Gerald Salzman.

Gerald Salzman, 82, serves as the Company's president, chief executive officer, chief financial officer, treasurer and assistant secretary. He is also the president, chief executive officer, chief financial officer and secretary of Journal Technologies. Although Mr. Salzman has started transitioning and delegating certain of his duties to other managers, a sudden loss of Mr. Salzman's services would be challenging for the Company given the number of roles he fills for both The Traditional Business and Journal Technologies.

Changes in accounting guidance could have a significant effect on the Company's reported financial results.

Preparing consolidated financial statements requires the Company's management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses. These estimates and assumptions are affected by management's application of accounting policies and the prevailing accounting guidance. The Company considers fair value measurement and disclosures, revenue recognition, accounting for software costs and income taxes to be critical accounting policies and estimates. A change in the accounting guidance with respect to one or more of these areas could materially affect the Company's reported financial results.

As noted above, beginning in fiscal 2019, changes in unrealized gains (losses) on marketable securities are included in the Company's net income (loss) and thus may have a significant impact on the Company's reported results depending on the fluctuations of the prices of the marketable securities owned by the Company.

We cannot be sure that customer information and systems are fully protected against security breaches.

Journal Technologies' software processes and stores customer information in the conduct of its business, including in some cases by utilizing cloud-based systems supplied by third-party vendors. Despite our efforts to maintain up-to-date security controls, it is possible that our system could be improperly used to access or misappropriate customer systems or information, including personally identifiable or other confidential information. A material security breach of this nature could harm our reputation, cause us to lose current and potential customers, require us to allocate more resources to information security, or subject us or our customers to liability, resulting in increased costs, loss of revenue, or both. The Traditional Business also operates certain websites that process and, in certain cases, store customer information. A minor security breach was discovered on a website operated by The Traditional Business in early fiscal 2015, and although it was remediated, there can be no assurance that there will not be more material breaches in the future. Also, our insurance may not cover all of the costs that we may incur as a result of a material security breach.

The Company has identified material weaknesses in its internal control over financial reporting.

The Company has identified material weaknesses in its internal control over financial reporting. The Company's internal control over financial reporting has been designed to provide management and the Board of Directors with reasonable assurance regarding the preparation and fair presentation of the Company's consolidated financial statements. As a small company, we are not able to segregate duties to the extent we could if we had more people, and we have not sufficiently designed controls that support an effective assessment of our internal controls relating to the prevention of fraud and possible management override of controls. Further, the Company does not have an internal audit group, and has not engaged an outside firm to complete the documentation of its internal control assessment to the level required by the applicable criteria.

We believe that our overall internal control environment is sufficient for a company of our size. However, the existence of material weaknesses means that there is a reasonable possibility that a material misstatement of our financial statements will not be prevented or detected on a timely basis. If we are not able to correct material weaknesses or deficiencies in internal controls in a timely way, our ability to record, process, summarize and report financial information accurately and within the time periods specified in the SEC's rules and forms will be adversely affected. Such a result could negatively impact the market price and trading liquidity of our stock, weaken investor confidence in our reported financial information, subject us to civil and criminal investigations and penalties, and generally materially and adversely affect our business and financial condition.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company owns office and printing facilities in Los Angeles and an office building in Logan, Utah, and leases space for its other offices under operating leases which expire at various dates through October 2023.

The main Los Angeles property is comprised of a two-story, 34,000 square foot building constructed in 1990, which is fully occupied by the Company. Approximately 75% of the building is devoted to office space and the remainder to printing and production equipment and facilities. In 2003, the Company finished building an adjacent 37,000 square foot building and parking facilities on properties it acquired in 1996 and 1998. This building provides additional office, production and storage space. The Company and Journal Technologies occupy this building's first floor and will complete the build-out of the second floor when needed.

In November 2015, the Company purchased a 30,700 square foot office building constructed in 1998 on about 3.6 acres in Logan, Utah that had been previously leased for Journal Technologies.

Item 3. Legal Proceedings

From time to time, the Company is subject to litigation arising in the normal course of its business. While it is not possible to predict the results of such litigation, management does not believe the ultimate outcome of these types of matters will have a material adverse effect on the Company's financial position or results of operations or cash flows.

Item 4. Mine Safety Disclosures

Not applicable.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The following table sets forth the sales prices of the Company's common stock for the periods indicated. Quotations are as reported by the NASDAQ Capital Market.

	High	Low
Fiscal 2021		
Quarter ended December 31, 2020	\$ 405.00	\$ 238.00
Quarter ended March 31, 2021	416.69	311.40
Quarter ended June 30, 2021	363.47	298.00
Quarter ended September 30, 2021	350.00	303.05
Fiscal 2020		
Quarter ended December 31, 2019	\$ 293.18	\$ 249.76
Quarter ended March 31, 2020	298.00	187.53
Quarter ended June 30, 2020	300.30	250.75
Quarter ended September 30, 2020	317.01	234.59

As of December 10, 2021, there were approximately 360 holders of record of the Company's common stock, and the last trade was at \$362 per share.

The Company did not declare or pay any dividends during fiscal 2021 or 2020. A determination by the Company whether or not to pay dividends in the future will depend on numerous factors, including the Company's earnings, cash flow, financial condition, capital requirements, future prospects, acquisition opportunities, and other relevant factors. The Board of Directors does not expect that the Company will pay any dividends or other distributions to shareholders in the foreseeable future.

The Company does not have any equity compensation plans, and it did not sell any securities, whether or not registered under the Securities Act of 1933, during the past two fiscal years.

From time to time, the Company has repurchased shares of its common stock and may do so in the future. The Company maintains a common stock repurchase program that was implemented in 1987 in combination with the Company's Management Incentive Plan. See Note 2 of Notes to Consolidated Financial Statements for more information. The Company's stock repurchase program remains in effect, but the Company did not repurchase any shares during fiscal 2021 and 2020.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

The Company continues to operate as two different businesses: (1) The Traditional Business, being the business of newspaper publishing and related services that the Company had before 1999 when it purchased a software development company, and (2) Journal Technologies, Inc. ("Journal Technologies"), a wholly-owned subsidiary which supplies case management software systems and related products to courts, prosecutor and public defender offices, probation departments and other justice agencies, including administrative law organizations, city and county governments and bar associations. These organizations use the Journal Technologies family of products to help manage cases and information electronically, to interface with other critical justice partners and to extend electronic services to the public, including efilg and a website to pay traffic citations and fees online. These products are licensed in 42 states and internationally.

Impact of the COVID-19 Pandemic

On March 13, 2020, the United States declared the outbreak of COVID-19 to be a national emergency, and several states and municipalities also declared public health emergencies. Unprecedented actions were taken by public health and governmental authorities to contain and combat the spread of COVID-19, including "stay-at-home" orders and similar mandates that restricted the daily activities of individuals and limited the operation of businesses that were deemed "non-essential". In addition, most of Journal Technologies' customers, which are primarily courts and governmental agencies in the United States, Canada and Australia, were either closed or significantly scaled back their activities. Similarly, many law firms and companies from which the Traditional Business derives advertising and subscription revenues also curtailed their in-person operations and spending.

Management believes that the COVID-19 pandemic has had, and, with the Delta and Omicron variant cases, will continue to have, a significant impact on the Company's business operations. Among other things, dividends from the Company's securities portfolio have declined and are expected to remain lower than in the past even though some banks have recently started to increase their dividends. It is also possible that governments may again take extreme actions in response to the pandemic and the Delta and Omicron variants, such as the renewed closure, or scaling back of operations, of courts and other governmental agencies that are the customers of the Company. Furthermore, even as courts, governmental agencies and other businesses return to more normal operations, there are likely to be changes in those operations and personal behaviors going forward, including limitations on travel and more working from home, that will adversely affect the Company, its financial results and cash flows.

Due to the uncertainties associated with the duration and severity of the COVID-19 pandemic, the efforts to contain it, and the changes in business operations and personal behaviors that are likely to follow from it, management cannot at this point estimate the magnitude of its impact on the Company's business operations. In recent years, the newspaper industry, including our Traditional Business, has declined, and we expect this to continue due to the impacts of COVID-19 and its aftermath, as advertising and subscription revenues decrease.

For Journal Technologies, there have been several delays or cancellations in government procurement processes. Also, although we have been able to complete some existing projects remotely, we have been unable to finish certain implementations and trainings because of our inability to work with clients in-person. Given that we are typically paid for implementation services upon "go-live" of a system, receipt of those revenues has been delayed. On the other side of the coin, the Company has seen a reduction in operating costs primarily due to lower headcount and reduced business travel.

Reportable Segments

The Company's Traditional Business is one reportable segment and the other is Journal Technologies. Additional details about each of the reportable segments and its corporate income and expenses is set forth below:

Overall Financial Results (000) For the twelve months ended September 30

	Reportable Segments				Corporate		Total

Capital expenditures	\$ 22	\$ 121	\$ 7	\$ 63	---	---	\$ 29	\$ 184

During fiscal 2021 and 2020, the Traditional Business had total operating revenues of \$14,895,000 and \$14,695,000 of which \$10,319,000 and \$9,605,000, respectively, were recognized after services were provided while \$4,576,000 and \$5,090,000, respectively, were recognized ratably over the subscription terms. Total operating revenues for the Company's software business were \$34,494,000 and \$35,247,000, of which \$14,787,000 and \$14,025,000, respectively, were recognized upon completion of services while \$19,707,000 and \$21,222,000, respectively, were recognized ratably over the subscription periods.

Fiscal 2021 compared with fiscal 2020

Consolidated Financial Comparison

Consolidated revenues were \$49,389,000 and \$49,942,000 for fiscal 2021 and 2020, respectively. This decrease of \$553,000 (1%) was primarily from decreases in (i) Journal Technologies' license and maintenance fees of \$603,000 and consulting fees of \$1,399,000, and (ii) the Traditional Business' trustee sale notice advertising net revenues of \$264,000, display advertising net revenues of \$92,000 and circulation revenues of \$514,000, partially offset by increases in (i) Journal Technologies' public service fees of \$1,249,000 and (ii) the Traditional Business' classified advertising net revenues of \$13,000, legal notice advertising net revenues of \$663,000 and government notice advertising net revenues of \$158,000.

Approximately 70% of the Company's revenues during fiscal 2021 were derived from Journal Technologies, as compared with 71% in the prior fiscal year. In addition, the Company's revenues have been primarily from the United States, with approximately 4% from foreign countries. Almost all of Journal Technologies' revenues are from governmental agencies.

Consolidated operating expenses decreased by \$3,988,000 (8%) to \$47,237,000 from \$51,225,000. Total salaries and employee benefits decreased by \$1,737,000 (5%) to \$36,065,000 from \$37,802,000 primarily resulting from lower headcount. Outside services decreased by \$344,000 (10%) to \$3,084,000 from \$3,428,000 mainly because of decreased independent contractor costs for Journal Technologies. Postage and delivery expenses decreased by \$58,000 (8%), and newsprint and printing expenses also decreased by \$74,000 (11%) to \$625,000 from \$699,000 primarily resulting from reduced subscribers. Depreciation and amortization costs decreased by \$44,000 (8%) to \$480,000 from \$524,000 because of more fully-depreciated assets. Rent expenses decreased by \$326,000 (53%) to \$286,000 from \$612,000 because of the closures of the Colorado office in August 2020 and the Corona, California office in March 2021. Equipment maintenance and software decreased by \$229,000 (18%) to \$1,039,000 from \$1,268,000 primarily resulted from reduced maintenance and software costs due to the above-mentioned office closures. Other general and administrative expenses decreased by \$1,612,000 (42%) to \$2,236,000 from \$3,848,000 mainly resulting from reduced business travel expenses due to the pandemic.

The Company's non-operating income, net of expenses, increased by \$145,389,000 to a gain of \$150,898,000 from \$5,509,000 in the prior fiscal year primarily because of the realized gains on sales of marketable securities of \$41,749,000 and the recording of net unrealized gains on marketable securities of \$106,499,000 during fiscal 2021, as compared with realized gains of \$4,193,000 and unrealized losses of \$3,099,000 during the prior fiscal year.

During fiscal 2021, consolidated pretax income was \$153,050,000, as compared to \$4,226,000 in the prior fiscal year. There was consolidated net income of \$112,900,000 (\$81.77 per share) for fiscal 2021, as compared with \$4,041,000 (\$2.93 per share) in the prior fiscal year.

During fiscal 2021, the Company's cash and cash equivalents and restricted cash decreased by \$14,324,000 to \$14,639,000 from \$28,963,000, primarily because of the purchase of additional marketable securities. At September 30, 2021, the aggregate fair market value of the Company's marketable securities was \$347,573,000. These securities had approximately \$244,093,000 of net unrealized gains before taxes of \$64,115,000. They generated approximately \$2,908,000 in dividends income during fiscal 2021, as compared with \$4,965,000 in the prior fiscal year. Most of the unrealized gains were in the common stocks of three U.S. financial institutions and one foreign manufacturer.

Taxes

For fiscal 2021, the Company recorded a provision for income taxes of \$40,150,000 on pretax income of \$153,050,000. The effective rate of 26% was higher than the statutory rate of 21% primarily due to the recording of (i) state taxes, which were offset by the dividends received deduction ("DRD"), resulting in a tax provision of \$1,260,000 on pretax income before the unrealized and realized gains on marketable securities, (ii) a tax provision of \$27,938,000 on the unrealized gains on marketable securities and (iii) a tax provision of \$10,952,000 on the realized gains on marketable securities. The Company was able to utilize all of its federal and certain state net operating losses ("NOLs") carryforward in fiscal 2021.

For fiscal 2020, the Company recorded an income tax provision of \$185,000 on pretax income of \$4,226,000. The effective tax rate was less than the statutory rate primarily due to the DRD, a benefit resulting from the Coronavirus Aid, Relief and Economic Security ("CARES") Act and net state tax benefits. The effective tax rate for fiscal 2020 was 4.4%, after including the DRD, the tax benefits from the CARES Act and state taxes.

The CARES Act, which was signed into law on March 27, 2020, contained two federal tax provisions beneficial to the Company: (i) net operating losses arising in tax years beginning in 2018, that were previously only available to be carried forward, were allowed to be carried back to the five previous years, and (ii) any alternative minimum tax credits carried forward from prior years could be claimed as a refund in years beginning in 2018. Consequently, the Company recorded a tax benefit, in fiscal 2020, resulting from carrying back a portion of the net operating loss generated in fiscal 2019 to fiscal 2014. The Company received refunds for all taxes and alternative minimum taxes paid in fiscal 2014. The tax benefit of \$187,000 resulting from carrying back the net operating loss was primarily attributable to the difference in the federal tax rates of 34% in fiscal 2014 and 21% in fiscal 2019.

During fiscal 2020, the Company recorded net unrealized losses on marketable securities of \$3,099,000. An income tax benefit of \$1,371,000 resulting from these losses was recorded as a temporary difference in deferred income taxes. The Company also recorded a net gain of \$4,193,000 on the sales of marketable securities.

The Company files consolidated federal income tax returns in the United States and with various state jurisdictions and is no longer subject to examinations for fiscal years before fiscal 2018 with regard to federal income taxes and fiscal 2017 for state income taxes.

The Traditional Business

The Traditional Business' pretax income increased by \$955,000 (187%) to \$443,000 from a pretax loss of \$512,000 in the prior fiscal year.

Advertising revenues increased by \$531,000 (7%) to \$7,635,000 from \$7,104,000, primarily because of increased legal notice advertising net revenues of \$663,000 mainly from fictitious business name publishing (as counties have tried to catch up with their backlogs), government notice advertising net revenues of \$158,000 and classified advertising net revenues of \$13,000. These increases were partially offset by decreased display advertising net revenues of \$92,000 and trustee sale notice advertising net revenues of \$264,000 primarily because of limited foreclosures due to the temporary halt or suspension of mortgage foreclosures in accordance with the federal COVID-19 related "Eviction and Foreclosure Orders" which started in February 2020 and expired in July 2021 with the eviction portion extended through the end of September 2021. In addition, although the national eviction ban has lapsed, many states or cities continue to have their own moratoriums. For example, Los Angeles County's "COVID-19 Tenant Protection" essentially prevents evictions for residential and commercial tenants through January 31, 2022.

Trustee sale notices are very much dependent on the number of California and Arizona foreclosures for which public notice advertising is required by law. The number of foreclosure notices published by the Company decreased by 43% during the twelve months ended September 30, 2021 as compared to the prior fiscal year, primarily because of limited foreclosures, as discussed above. The Company's smaller newspapers, those other than the Los Angeles and San Francisco Daily Journals ("The Daily Journals"), accounted for about 87% of the total public notice advertising revenues in fiscal 2021. Public notice advertising revenues and related advertising and other service fees, including trustee sales legal advertising revenues, constituted about 17% of the Company's total operating revenues in fiscal 2021 and 15% in 2020.

The Daily Journals accounted for about 91% of the Traditional Business' total circulation revenues, which declined by \$514,000 (10%) to \$4,576,000 from \$5,090,000. The court rule and judicial profile services generated about 6% of the total circulation revenues, with the other newspapers and services accounting for the balance. Advertising service fees and other are Traditional Business segment revenues, which include primarily (i) agency commissions received from outside newspapers in which the advertising is placed, and (ii) fees generated when filing notices with government agencies.

The Traditional Business segment operating expenses decreased by \$755,000 (5%) to \$14,452,000 from \$15,207,000, primarily resulting from reduced outside services.

Journal Technologies

During fiscal 2021, Journal Technologies' business segment pretax income increased by \$2,480,000 (322%) to \$1,709,000 from a pretax loss of \$771,000 in the prior fiscal year.

Revenues decreased by \$753,000 (2%) to \$34,494,000 from \$35,247,000 in the prior fiscal year. Licensing and maintenance fees decreased by \$603,000 (3%) to \$21,044,000 from \$21,647,000 primarily resulting from the reduction in legacy software products' maintenance and support revenues as the Company ended effective July 1, 2021 the maintenance of these legacy software products, so as to focus on supporting the Company's main eSeries products. Consulting fees decreased by \$1,399,000 (18%) to \$6,319,000 from \$7,718,000 due to fewer go-lives. Other public service fees increased by \$1,249,000 (21%) to \$7,131,000 from \$5,882,000 primarily due to increased traffic citation fee revenues and e-filing fee revenues.

Deferred consulting fees primarily represent advances from customers of Journal Technologies for installation services and are recognized upon final project go-lives. Deferred revenues on license and maintenance contracts represent prepayments of annual license and maintenance fees and are recognized ratably over the maintenance period.

Operating expenses decreased by \$3,233,000 (9%) to \$32,785,000 from \$36,018,000 primarily because of decreased personnel costs primarily due to lower headcount and reduced business travel expenses.

Journal Technologies continues to update and upgrade its software products. These costs are expensed as incurred and will impact earnings at least through the foreseeable future.

Liquidity and Capital Resources

During fiscal 2021, the Company's cash and cash equivalents, restricted cash, and marketable security positions increased by \$153,881,000, after additional net borrowing of \$2,507,000 and net pretax unrealized gains on marketable securities of \$106,499,000. Cash, cash equivalents and the proceeds from the sales of marketable securities were primarily used to purchase additional marketable securities of \$64,990,000 and pay down the real estate loan principal of \$131,000.

The investments in marketable securities, which had an adjusted cost basis of approximately \$103,480,000 and a market value of about \$347,573,000 at September 30, 2021, generated approximately \$2,908,000 in dividends income during fiscal 2021. These securities had approximately 244,093,000 of net unrealized gains before estimated taxes of \$64,115,000 which will become due only when we sell securities in which there is unrealized appreciation.

Cash flows from operating activities increased by \$950,000 during fiscal 2021 as compared to the prior fiscal year, primarily due to (i) decreases in the Company's income tax receivable of \$1,049,000 and deferred tax assets of \$31,305,000, (ii) increases in the Company's income tax payable of \$6,244,000; accounts payable and accrued liabilities of \$1,055,000 (because of the timing difference in remitting e-filing fees to the courts) and the additional accrual to the long-term supplemental compensation accrual of \$1,835,000 and (iii) a net increase in deferred revenues of \$757,000. This was partially offset by (i) a decrease in net income of \$38,295,000, excluding the additional realized gains on sales of marketable securities of \$37,556,000 and increases in unrealized gains on marketable securities of \$109,598,000 and (ii) an increase in accounts receivable of \$3,106,000 primarily resulting from more billings. Cash provided from operating activities of \$3,286,000 included net decreases of \$1,051,000 in total current and long-term deferred revenues of \$18,325,000.

As of September 30, 2021, the Company had working capital of \$338,324,000, including the liabilities for deferred subscriptions, deferred consulting fees and deferred maintenance agreements and others of \$17,330,000.

The Company believes that it will be able to fund its operations for the foreseeable future through its cash flows from operations and its current working capital and expects that any such cash flows will be invested in its businesses. The Company may or may not have the ability to borrow additional amounts against its marketable securities and, among other possibilities, it may be required to consider selling some of those securities to generate cash if needed to fund ongoing operations. The amount available for borrowing is based on the market value of the Company's investment portfolio and fluctuates depending on the value of the underlying securities. In addition, the Company could be subject to margin calls should the balance of the investment decrease significantly. (Also see "Risks Associated with Our Holdings of Marketable Securities" mentioned above.)

The Company is not a smaller version of Berkshire Hathaway Inc. Instead, it hopes to be a significant software company while it also operates its Traditional Business.

Critical Accounting Policies and Estimates

The Company's financial statements and accompanying notes are prepared in accordance with U.S. generally accepted accounting principles. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. These estimates and assumptions are affected by management's application of accounting policies. Management believes that revenue recognition, accounting for software costs, fair value measurement and disclosures, income taxes and segment reporting are critical accounting policies and estimates.

The Company recognizes revenues in accordance with the provisions of ASU No. 2014-09, *Revenue from Contracts with Customers* (ASC Topic 606). For the Traditional Business, proceeds from the sale of subscriptions for newspapers, court rule books and other publications and other services are recorded as deferred revenue and are included in earned revenue only when the services are provided, generally over the subscription term. Advertising revenues are recognized when advertisements are published and are net of agency commissions.

Journal Technologies contracts may include several products and services, which are generally distinct and include separate transaction pricing and performance obligations. Most are one-transaction contracts. These current subscription-type contract revenues include (i) implementation consulting fees to configure the system to go-live, (ii) subscription software license, maintenance (including updates and upgrades) and support fees, and (iii) third-party hosting fees when used. Revenues for consulting are recognized at point of delivery (go-live) upon completion of services. These contracts include assurance warranty provisions for limited periods and do not include financing terms. For some contracts, the Company acts as a principal with respect to certain services, such as data conversion, interfaces and hosting that are provided by third-parties, and recognizes such revenues on a gross basis. For legacy contracts with perpetual license arrangements, licenses and consulting services are recognized at point of delivery (go-live), and maintenance revenues are recognized ratably after the go-live. Other public service fees are earned and recognized as revenues when the Company processes credit card payments on behalf of the courts via its websites through which the public can efile cases and pay traffic citations and other fees.

ASC 985-20, *Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed*, provides that costs related to the research and development of a new software product are to be expensed as incurred until the technological feasibility of the product is established. Accordingly, costs related to the development of new software products are expensed as incurred until technological feasibility has been established, at which time such costs are capitalized, subject to expected recoverability. In general, "technological feasibility" is achieved when the developer has established the necessary skills, hardware and technology to produce a product and a detailed program design has been (i) completed, (ii) traced to the product specifications and (iii) reviewed for high-risk development issues. The Company believes its process for developing software is essentially completed concurrent with the establishment of technological feasibility, and accordingly, no software development costs have been capitalized to date.

ASC 820, *Fair Value Measurement and Disclosures*, requires the Company to (i) disclose the amounts of transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfers and (ii) present separately information about purchases, sales, issuances and settlements in the reconciliation of Level 3 measurements. This guidance also provides clarification of existing disclosures requiring the Company to determine each class of its investments based on risk and to disclose the valuation techniques and inputs used to measure fair value for both Level 2 and Level 3 measurements. The Company made no transfers in and out of Level 1 and Level 2 measurements in fiscal years 2021 and 2020. During that time all of the Company's investments have been quoted on public markets and, therefore, all fair value calculations have been based on Level 1 measurements. The estimated Incentive Plan's future commitment is calculated using Level 3 inputs, based on an average of the prior fiscal year (fiscal 2020) and the current year's pretax earnings before certain items, discounted to the present value at 6% since each granted Incentive Plan Unit will expire over its remaining life term of up to 10 years.

ASC 740, *Income Taxes*, establishes financial accounting and reporting standards for the effect of income taxes. The objectives of accounting for income taxes are to recognize the amount of taxes payable or refundable for the current year and the deferred tax liabilities and assets for the future tax consequences of events that have been recognized in the financial statements or tax returns. This accounting guidance also prescribes recognition thresholds and measurement attributes for the financial statements recognition and measurement of a tax position taken or expected to be taken in a tax return. Judgment is required in assessing the future tax consequences of events that have been recognized in the Company's financial statements or tax returns. Fluctuations in the actual outcome of these future tax consequences could materially impact the Company's financial position or its results of operations and its deferred tax liabilities related to the unrealized net gains on investments. See Note 3 of Notes to Consolidated Financial Statements for further discussion.

ASC 280-10, *Segment Reporting*, defines an operating segment as a component of a public entity that has discrete financial information that is evaluated regularly by the Company's Chief Executive Officer to decide how to allocate resources and to assess performance. In accordance with ASC 280-10, the Company has two reportable business segments which are: (i) the Traditional Business and (ii) Journal Technologies.

The above discussion and analysis should be read in conjunction with the consolidated financial statements and the notes thereto included in this report.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To The Board of Directors and Shareholders of Daily Journal Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Daily Journal Corporation (the Company) as of September 30, 2021 and 2020, the related consolidated statements of comprehensive income, shareholders' equity and cash flows for the years then ended, and the related notes to the consolidated financial statements (collectively, the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of September 30, 2021 and 2020, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (PCAOB) and are required to be independent with respect to the Company in accordance with U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Software Revenue Recognition

As discussed in Notes 2 to the consolidated financial statements, the Company generates revenue from the sale of products that include software licenses, maintenance, support fees, and services. The Company's contracts with customers often include promises to transfer multiple products and services to a customer related to the Journal Technologies segment. Arrangements with customers can involve multiple performance obligations and rights. The Company recognized \$21.04 million of licensing and maintenance fees for the year ended September 30, 2021.

We identified the evaluation of the Company's analysis of terms and conditions in significant software and license contracts with customers and their effect on revenue recognition as a critical audit matter. Complex auditor judgment was required to assess the Company's determination of the performance obligations and allocation of transaction price.

The primary procedures we performed to address this critical audit matter included:

- Obtaining an understanding of the Company's revenue recognition policy and evaluated for appropriateness
- Evaluating the design and implementation of certain internal controls related to the Company's revenue recognition process, including controls related to the Company's analysis of terms and conditions in software and license contracts with customers and their effect on revenue recognition.
- Inquiring of personnel outside of the accounting function to corroborate our understanding of certain terms and conditions for a selection of revenue transactions.
- Testing a sample of software and license transactions by inspecting the underlying customer agreements and invoices, and evaluating the Company's recognition in accordance with revenue recognition policy.

/s/ Baker Tilly US, LLP

We have served as the Company's auditor since 2016.

DAILY JOURNAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. THE COMPANY AND OPERATIONS

Daily Journal Corporation ("Daily Journal") publishes newspapers and websites covering California and Arizona and produces several specialized information services. It also serves as a newspaper representative specializing in public notice advertising.

Journal Technologies, Inc. ("Journal Technologies"), a wholly-owned subsidiary of Daily Journal, supplies case management software systems and related products to courts, prosecutor and public defender offices, probation departments and other justice agencies, including administrative law organizations, city and county governments and bar associations. These organizations use the Journal Technologies family of products to help manage cases and information electronically, to interface with other critical justice partners and to extend electronic services to the public, including efilings and a website to pay traffic citations and fees online. These products are licensed in 42 states and internationally.

Essentially all of the Company's U.S. operations are based in California, Arizona and Utah. The Company also has a presence in Australia where Journal Technologies is working on three software installation projects.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation: The consolidated financial statements include the accounts of the Daily Journal and Journal Technologies (collectively the "Company"). All intercompany accounts and transactions have been eliminated in consolidation.

Certain reclassifications of previously reported amounts have been made to conform to the current year's presentation.

Concentrations of Credit Risk: The Company extends unsecured credit to most of its advertising customers. The Company recognizes that extending credit and setting appropriate reserves for receivables is largely a subjective decision based on knowledge of the customer and the industry. Credit limits, setting and maintaining credit standards, and managing the overall quality of the credit portfolio is largely centralized. The level of credit is influenced by the customer's credit and payment history which the Company monitors when establishing a reserve.

The Company maintains the reserve account for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of its customers were to deteriorate or its judgments about their abilities to pay are incorrect, additional allowances might be required and its results of operations could be materially affected.

Cash Equivalents: The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Restricted Cash: The Company considers cash to be restricted when withdrawal or general use is legally restricted. Restricted cash of \$2,043,000 and \$2,041,000 at September 30, 2021 and 2020, respectively, represents cash held to secure two letters of credit issued by a bank for a software installation contract in Australia.

Fair Value of Financial Instruments: The carrying amounts of cash, accounts receivable and accounts payable approximate fair value because of their short maturities. In addition, the Company has investments in marketable securities, all categorized as “available-for-sale” and stated at fair market value. In fiscal 2019, the Company adopted Accounting Standards Update (“ASU”) No. 2016-01, *Financial Instruments – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. This ASU requires an entity that holds financial assets or owes financial liabilities to, among other things, measure equity investments at fair value and recognize unrealized gains (losses) through net income (loss). Accordingly, the Company’s net income of \$112,900,000 for fiscal 2021, included net unrealized gains on marketable securities of \$ 106,499,000. In fiscal 2020, the Company’s net income of \$4,041,000 included net unrealized losses on marketable securities of \$ 3,099,000. The Company uses quoted prices in active markets for identical assets (consistent with the Level 1 definition in the fair value hierarchy) to measure the fair value of its marketable securities on a recurring basis pursuant to Accounting Standards Codification (“ASC”) Topic 820, *Fair Value Measurement and Disclosures*. At September 30, 2021, the aggregate fair market value of the Company’s marketable securities was \$ 347,573,000. These marketable securities had approximately \$244,093,000 of net unrealized gains before taxes of \$ 64,115,000. Most of the unrealized net gains were in the common stocks of three U.S. financial institutions and one foreign manufacturer. At September 30, 2020, the Company had marketable securities at fair market value of approximately \$ 179,368,000, including approximately \$137,593,000 of unrealized net gains before taxes of \$ 35,870,000.

All marketable securities are classified as “Current assets” because they are available for sale at any time. During fiscal 2021, the Company sold part of its marketable securities for approximately \$45,033,000, realizing a total gain of approximately \$ 41,749,000, and simultaneously bought some other companies’ marketable securities for an aggregated cost of approximately \$64,990,000. During the prior fiscal year, the Company sold part of its marketable securities for \$16,307,000, realizing a net gain of approximately \$ 4,193,000.

Investment in Financial Instruments

	September 30, 2021			September 30, 2020		
	Aggregate fair value	Amortized/ Adjusted cost basis	Pretax unrealized gains	Aggregate fair value	Amortized/ Adjusted cost basis	Pretax unrealized gains
Marketable securities						
Common stocks	\$347,573,000	\$103,480,000	\$244,093,000	\$179,368,000	\$ 41,775,000	\$137,593,000

As of September 30, 2021, there existed unrealized losses related to one of the newly acquired marketable securities.

Inventories: Inventories, comprised of newsprint and paper, are stated at cost, on a first-in, first-out basis, which does not exceed current net realizable value.

Property, plant and equipment: Property, plant and equipment are carried on the basis of cost or fair value for assets acquired in business combinations. Depreciation of assets is provided in amounts sufficient to depreciate the cost of related assets over their estimated useful lives ranging from 3 – 39 years. At September 30, 2021, the estimated useful lives were (i) 5 – 39 years for building and improvements, (ii) 3 – 5 years for furniture, office equipment and software, and (iii) 3 – 10 years for machinery and equipment. Leasehold improvements are amortized over the term of the related leases or the useful life of the assets, whichever is shorter. Assets are depreciated using the straight-line method for financial statements and accelerated method for tax purposes. Depreciation and amortization expenses were \$480,000 and \$524,000 for fiscal 2021 and 2020, respectively.

Significant expenditures which extend the useful lives of existing assets are capitalized. Maintenance and repair costs are expensed as incurred. Gains or losses on dispositions of assets are reflected in current earnings.

Impairment of Long-Lived Assets: The Company evaluates long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. There were no such impairments identified during fiscal 2021 and 2020.

Journal Technologies' Software Development Costs: Development costs related to software products for sale or licensing are expensed as incurred until the technological feasibility of the product has been established. Thereafter, until the product is released for sale, software development costs are capitalized and reported at the lower of unamortized cost or net realizable value of the related product. The establishment of technological feasibility and the ongoing assessment of recoverability of costs require considerable judgment by the Company with respect to certain internal and external factors, including, but not limited to, anticipated future product revenue, estimated economic life and changes in hardware and software technology.

The Company believes its process for developing software is essentially completed concurrent with the establishment of technological feasibility, and accordingly, no software development costs have been capitalized to date.

Revenue Recognition:

The Company recognizes revenues in accordance with the provisions of ASU No. 2014-09, *Revenue from Contracts with Customers* (ASC Topic 606).

For the Traditional Business, proceeds from the sale of subscriptions for newspapers, court rule books and other publications and other services are recorded as deferred revenue and are included in earned revenue only when the services are provided, generally over the subscription term. Advertising revenues are recognized when advertisements are published and are net of agency commissions.

Journal Technologies contracts may include several products and services, which are generally distinct and include separate transaction pricing and performance obligations. Most are one-transaction contracts. These current subscription-type contract revenues include (i) implementation consulting fees to configure the system to go-live, (ii) subscription software license, maintenance (including updates and upgrades) and support fees, and (iii) third-party hosting fees when used. Revenues for consulting are recognized at point of delivery (go-live) upon completion of services. These contracts include assurance warranty provisions for limited periods and do not include financing terms. For some contracts, the Company acts as a principal with respect to certain services, such as data conversion, interfaces and hosting that are provided by third-parties, and recognizes such revenues on a gross basis. For legacy contracts with perpetual license arrangements, licenses and consulting services are recognized at point of delivery (go-live), and maintenance revenues are recognized ratably after the go-live. Other public service fees are earned and recognized as revenues when the Company processes credit card payments on behalf of the courts via its websites through which the public can efile cases and pay traffic citations and other fees.

The adoption of ASC 606 also requires the capitalization of certain costs of obtaining contracts, specifically sales commissions which are to be amortized over the expected term of the contracts. For its software contracts, the Company incurs an immaterial amount of sales commission costs which have no significant impact on the Company's financial condition and results of operations. In addition, the Company's implementation and fulfillment costs do not meet all criteria required for capitalization.

Since the Company recognizes revenues when it can invoice the customer pursuant to the contract for the value of completed performance, as a practical expedient and because reliable estimates cannot be made, it has elected not to include the transaction price allocated to unsatisfied performance obligations. Also, as a practical expedient, the Company has elected not to include its evaluation of variable consideration of certain usage based fees (i.e. public service fees) that are included in some contracts. Furthermore, there are no fulfillment costs to be capitalized for the software contracts because these costs do not generate or enhance resources that will be used in satisfying future performance obligations.

Approximately 70% and 71% of the Company's revenues in fiscal 2021 and 2020, respectively, were derived from sales of software licenses, annual software licenses, maintenance and support agreements and consulting services that typically include implementation and training.

The change in allowance for doubtful accounts is as follows:

<u>Allowance for Doubtful Accounts</u>				
Description	Balance at Beginning of Year	Additions (Reductions) Charged to Costs and Expenses	Accounts Charged off less Recoveries	Balance at End of Year
Fiscal 2021				
Allowance for doubtful accounts	\$ 250,000	\$ (3,000)	\$ 3,000	\$ 250,000
Fiscal 2020				
Allowance for doubtful accounts	\$ 200,000	\$ 116,000	\$ (66,000)	\$ 250,000

Management Incentive Plan: In fiscal 1987, the Company implemented a Management Incentive Plan (the "Incentive Plan") that entitles a participant to participate in pretax earnings before adjustment for certain items of the Company for ten years.

Certificate interests entitled participants to receive 4.96% and 7.51% (amounting to \$332,940 and \$502,700, respectively) of Daily Journal non-consolidated income before taxes, workers' compensation, supplemental compensation and certain other items, 12.33% and 9.78% (amounting to \$255,300 and \$0, respectively) for Journal Technologies and 12.24% and 8.2% (amounting to \$1,049,750 and \$452,900, respectively) for Daily Journal consolidated in fiscal 2021 and 2020, respectively. (During fiscal 2021, three employees were transferred from the "Daily Journal non-consolidated" program to the "Daily Journal consolidated" program.) The Company accrued \$3,280,000 and \$1,445,000 as of September 30, 2021 and 2020, respectively, for the Plan's future commitment for those who will still have Certificates at the age of 65. This future commitment included an increase in the accrual in fiscal 2021 of \$1,835,000 or \$1.33 per outstanding share on an adjusted pretax basis as compared with an increase in fiscal 2020 of \$1,215,000 or \$.88 per outstanding share, in each case due to increased estimated future pretax income. The estimated Incentive Plan's future commitment is calculated based on an average of the past year and the current year pretax earnings before certain items, discounted to the present value at 6% because each granted Certificate will expire over its remaining life term of up to 10 years.

Income taxes: The Company accounts for income taxes using an asset and liability approach which requires the recognition of deferred tax liabilities and assets for the expected future consequences of temporary differences between the carrying amounts for financial reporting purposes and the tax basis of the assets and liabilities. The Company accounts for uncertainty in income taxes under ASC 740-10 which prescribes a recognition threshold and measurement methodology to recognize and measure an income tax position taken, or expected to be taken, in a tax return. The evaluation of a tax position is based on a two-step approach. The first step requires an entity to evaluate whether the tax position would "more likely than not" be sustained upon examination by the appropriate taxing authority. The second step requires the tax position be measured at the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement. In addition, previously recognized benefits from tax positions that no longer meet the new criteria would be derecognized.

Net income per common share: The net income per common share is based on the weighted average number of shares outstanding during each year. The shares used in the calculation were 1,380,746 for fiscal 2021 and 2020. The Company does not have any common stock equivalents, and therefore basic and diluted net income per share is the same.

Use of Estimates: The presentation of the Company's financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Right-of-Use (ROU) Asset

At the beginning of fiscal 2020, the Company adopted ASU 2016-02, *Leases (Topic 842)* which requires that all leases be recognized by lessees on the balance sheet through a right-of-use (ROU) asset and corresponding lease liability, including today's operating leases. There has been no significant impact on the Company's financial condition, results of operations or disclosures. At September 30, 2021, the Company recorded a ROU asset and lease liability of approximately \$ 215,000 for its operating office and equipment leases, including approximately \$103,000 beyond one year. Operating office and equipment leases are included in operating lease ROU assets, current accrued liabilities and long-term accrued liabilities in the Company's accompanying Consolidated Balance Sheets.

Accrued Liabilities

Accrued liabilities primarily consisted of accrued payroll at September 30, 2021 and 2020.

New Accounting Pronouncement:

No other new accounting pronouncement issued or effective has had, or is expected to have, a material impact on the Company's consolidated financial statements.

3. INCOME TAXES

The provision (benefit) from income taxes consists of the following:

	2021	2020
Current:		
Federal	\$ 5,420,000	\$ (420,000)
State	2,835,000	15,000
	<u>8,255,000</u>	<u>(405,000)</u>
Deferred:		
Federal	24,385,000	808,000
State	7,510,000	(218,000)
	<u>31,895,000</u>	<u>590,000</u>
	<u>\$ 40,150,000</u>	<u>\$ 185,000</u>

The difference between the statutory federal income tax rate and the Company's effective rate is summarized below:

	2021	2020
Statutory federal income tax rate	21.0%	21.0%
State franchise taxes (net of federal tax benefit)	5.2	5.6
Effect of state rate change on beginning balance of deferred tax liabilities	0.1	(9.4)
Business meals/gifts/other permanent differences	---	0.6
Dividends received deduction	(0.2)	(11.1)
Revenue recognized for book but not tax	---	0.4
Foreign tax credits	---	(0.4)
CARES Act benefits	---	(4.4)
Others	0.1	2.1
Effective tax rate	<u>26.2%</u>	<u>4.4%</u>

The Company's deferred income tax assets and liabilities were comprised of the following:

	2021	2020
Deferred tax assets attributable to:		
Accrued liabilities, including supplemental compensation and vacation pay accrual	\$ 1,603,000	\$ 415,000
Impairment losses on marketable securities	113,000	1,016,000
Bad debt reserves not yet deductible	55,000	55,000
Depreciation and amortization	3,065,000	3,482,000
Deferred revenues	1,836,000	913,000
Goodwill	520,000	590,000
Net operating losses	561,000	4,768,000
Credits and other	268,000	432,000
Total deferred tax assets	<u>8,021,000</u>	<u>11,671,000</u>
Deferred tax liabilities attributable to:		
Unrealized gains on marketable securities	<u>(64,115,000)</u>	<u>(35,870,000)</u>
Net deferred income taxes	<u>\$ (56,094,000)</u>	<u>\$ (24,199,000)</u>

For fiscal 2021, the Company recorded a provision for income taxes of \$ 40,150,000 on pretax income of \$153,050,000. The effective rate of 26% was higher than the statutory rate of 21% primarily due to the recording of (i) state taxes, which were offset by the dividends received deduction, resulting in a tax provision of \$1,260,000 on pretax income before the unrealized and realized gains on marketable securities, (ii) a tax provision of \$27,938,000 on the unrealized gains on marketable securities and (iii) a tax provision of \$10,952,000 on the realized gains on marketable securities.

For fiscal 2020, the Company recorded an income tax provision of \$ 185,000 on pretax income of \$4,226,000. The effective tax rate was less than the statutory rate primarily due to the DRD, a benefit resulting from the Coronavirus Aid, Relief and Economic Security ("CARES") Act and net state tax benefits. The effective tax rate for fiscal 2020 was 4.4%, after including the DRD, the tax benefits from the CARES Act and state taxes.

The CARES Act, which was signed into law on March 27, 2020, contained two federal tax provisions beneficial to the Company: (i) net operating losses arising in tax years beginning in 2018, that were previously only available to be carried forward, were allowed to be carried back to the five previous years, and (ii) any alternative minimum tax credits carried forward from prior years could be claimed as a refund in years beginning in 2018. Consequently, the Company recorded a tax benefit, in fiscal 2020, resulting from carrying back a portion of the net operating loss generated in fiscal 2019 to fiscal 2014. The Company received refunds for all taxes and alternative minimum taxes paid in fiscal 2014. The tax benefit of \$187,000 resulting from carrying back the net operating loss was primarily attributable to the difference in the federal tax rates of 34% in fiscal 2014 and 21% in fiscal 2019.

During fiscal 2020, the Company recorded net unrealized losses on marketable securities of \$ 3,099,000. An income tax benefit of \$1,371,000 resulting from these losses was recorded as a temporary difference in deferred income taxes. The Company also recorded a net gain of \$4,193,000 on the sales of marketable securities.

The Company files consolidated federal income tax returns in the United States and with various state jurisdictions and is no longer subject to examinations for fiscal years before fiscal 2018 with regard to federal income taxes and fiscal 2017 for state income taxes.

The Company is utilizing all of its federal and certain state net operating losses in fiscal 2021. California has suspended the use of NOLs for fiscal years beginning in 2020, 2021 and 2022. As a result, the Company has \$5.5 million of California NOLs expiring in fiscal years 2038 and 2039. The Company also has NOLs in other states, expiring as follows:

<u>Fiscal Year ended</u>	<u>California NOLs</u>	<u>Other State NOLs</u>
September 30, 2032	\$ ---	\$.1
September 30, 2037	---	.1
September 30, 2038	4.8	.2
September 30, 2039	.7	.1
No expiration	---	1.9
Total	<u>\$ 5.5</u>	<u>\$ 2.4</u>

4. DEBTS AND COMMITMENTS

During fiscal 2013, the Company borrowed from its investment margin account the aggregate purchase price of \$ 29.5 million for two acquisitions, in each case pledging its marketable securities as collateral. The interest rate for these investment margin account borrowings fluctuates based on the Federal Funds Rate plus 50 basis points with interest only payable monthly. The interest rate as of September 30, 2021 was .75%. These investment margin account borrowings do not mature.

In November 2015, the Company purchased a 30,700 square foot office building constructed in 1998 on about 3.6 acres in Logan, Utah that had been previously leased by Journal Technologies. The Company paid \$1.24 million and financed the balance with a real estate bank loan of \$2.26 million which had a fixed interest rate of 4.66%. This loan is secured by the Logan facility and can be paid off at any time without prepayment penalty. In October 2020, the Company executed an amendment to lower the interest rate of this loan to a fixed rate of 3.33% for the remaining of its 10 years. This real estate loan had a balance of approximately \$ 1.58 million as of September 30, 2021. Each monthly installment payment is about \$16,700.

The Company also owns its facilities in Los Angeles and leases space for its other offices under operating leases which expire at various dates through October 2023.

The Company is responsible for a portion of maintenance, insurance and property tax expenses relating to the leased properties. Rental expenses, inclusive of these expenses, for fiscal years 2021 and 2020 were \$286,000 and \$612,000, respectively.

The following table represents the Company's future obligations

	Payments due by Fiscal Year						Total
	2022	2023	2024	2025	2026	2027 and after	
Real estate loan	\$ 148,000	\$ 153,000	\$ 158,000	\$ 164,000	\$ 169,000	\$ 786,000	\$1,578,000
Obligations under operating leases	155,000	67,000	3,000	---	---	---	225,000
Long-term accrued liabilities*	---	1,102,000	539,000	424,000	377,000	838,000	3,280,000
	<u>\$ 303,000</u>	<u>\$1,322,000</u>	<u>\$ 700,000</u>	<u>\$ 588,000</u>	<u>\$ 546,000</u>	<u>\$1,624,000</u>	<u>\$5,083,000</u>

* The long-term accrued liabilities for the Management Incentive Plan are discounted to the present value using a discount rate of 6%.

5. CONTINGENCIES

From time to time, the Company is subject to litigation arising in the normal course of its business. While it is not possible to predict the results of such litigation, management does not believe the ultimate outcome of these matters will have a material adverse effect on the Company's financial position, results of operations or cash flows.

6. REPORTABLE SEGMENTS

An operating segment is defined as a component of an enterprise which has discrete financial information that is evaluated regularly by the Company's Chief Executive Officer to decide how to allocate resources and to access performance.

In accordance with ASC 280-10, *Segment Reporting*, the Company has two segments of business. The Company's reportable segments are: (i) the Traditional Business and (ii) Journal Technologies. All inter-segment transactions were eliminated.

Additional details about each of the reportable segments and its corporate income and expenses is set forth below:

Overall Financial Results (000)								
For the twelve months ended September 30								
	Reportable Segments				Corporate		Total	
	Traditional Business		Journal Technologies		2021	2020	2021	2020
	2021	2020	2021	2020				
Revenues								
Advertising	\$ 7,635	\$ 7,104	\$ ---	\$ ---	\$ ---	\$ ---	\$ 7,635	\$ 7,104
Circulation	4,576	5,090	---	---	---	---	4,576	5,090

Net unrealized gains (losses) on marketable securities	---	---	---	---	106,499	(3,099)	106,499	(3,099)
Pretax income (loss)	443	(512)	1,709	(771)	150,898	5,509	153,050	4,226
Income tax (expense) benefit	(115)	100	(425)	100	(39,610)	(385)	(40,150)	(185)
Net income (loss)	\$ 328	\$ (412)	\$ 1,284	\$ (671)	\$ 111,288	\$ 5,124	\$ 112,900	\$ 4,041
Total assets	\$ 22,412	\$ 35,896	\$ 20,480	\$ 22,277	\$ 347,685	\$ 180,402	\$ 390,577	\$ 238,575
Capital expenditures	\$ 22	\$ 121	\$ 7	\$ 63	---	---	\$ 29	\$ 184

During fiscal 2021 and 2020, the Traditional Business had total operating revenues of \$ 14,895,000 and \$14,695,000 of which \$10,319,000 and \$9,605,000, respectively, were recognized after services were provided while \$ 4,576,000 and \$5,090,000, respectively, were recognized ratably over the subscription terms. Total operating revenues for the Company's software business were \$34,494,000 and \$35,247,000, of which \$14,787,000 and \$14,025,000, respectively, were recognized upon completion of services while \$19,707,000 and \$21,222,000, respectively, were recognized ratably over the subscription periods.

7. SUBSEQUENT EVENTS

The Company has completed an evaluation of all subsequent events through the issuance date of these financial statements and concluded that no additional subsequent events occurred that required recognition in the financial statements or disclosures in the Notes to Consolidated Financial Statements.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Company's management, including Gerald L. Salzman, its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of September 30, 2021. Based on that evaluation, management concluded that its disclosure controls and procedures were not effective as of September 30, 2021. There exist material weaknesses in its internal control over financial reporting because the Company does not segregate duties to the extent it could if it had more people and the Company does not have sufficient controls to support an effective management assessment of internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting has been designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of the Company's consolidated financial statements. All internal controls, no matter how well designed, have inherent limitations, and sometimes they can have one or more material weaknesses. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim consolidated financial statements will not be prevented or detected on a timely basis.

Each year, management is required by SEC rules to evaluate the effectiveness of the Company's internal control over financial reporting. If management identifies any material weaknesses in the course of the evaluation, the rules do not allow us to conclude that our internal control over financial reporting is effective. That evaluation is conducted under the supervision and with the participation of Mr. Salzman, and is based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 2013. Based on the evaluation under that framework and applicable SEC rules, management has identified the following deficiencies that constitute material weaknesses in the Company's internal control over financial reporting:

Segregation of duties: As a small company, we have one long-time knowledgeable manager overseeing both our advertising and subscription departments, eight experienced employees in the accounting department and three in the IT department. Accordingly, we are not able to segregate duties to the extent we could if we had more people. Although the Company has remediated some of the issues associated with administrative access to specific systems, these steps have not fully remediated the control issue.

Ineffective management assessment of internal control over financial reporting: The Company does not have an internal audit group due to the small size of its accounting department, and we have not sufficiently designed controls that support an effective assessment of our internal controls relating to the prevention of fraud and possible management override of controls. Hiring an outside firm would certainly help complete the documentation of the internal control assessment to the level required by the COSO framework, but the Company questions whether that would be a wise use of shareholders' money.

Recognizing our deficiencies, we use mitigating controls, including a variety of internal procedures to check and double-check the areas where one person is responsible for multiple duties. Among other things, the Company's monitoring activities include monthly review and comparative analysis of financial, production and public information with prior periods by the Company's department supervisors, the CEO/CFO and the Board of Directors. We will continue to review our compensating controls and procedures in our efforts to mitigate or remediate the above mentioned material weaknesses.

In addition, we believe our most important internal control is our hiring and retention of honest and capable people, whom we trust to do their jobs well. Accordingly, we believe our overall internal control environment is sufficient for a company of our size.

In the context of the COSO 2013 Framework, however, we believe that the above-mentioned control deficiencies constitute material weaknesses, and therefore we must conclude that our internal control over financial reporting was not effective as of September 30, 2021.

Changes in Internal Control over Financial Reporting

Except as described above under Management's Report on Internal Control over Financial Reporting, there were no other changes in our internal control over financial reporting that occurred during the quarter ended September 30, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information set forth in the tables, the notes thereto, and the paragraphs under the captions "Election of Directors", "Corporate Governance" and "Delinquent Section 16(a) Reports" in the Company's definitive Proxy Statement for the Annual Meeting of Shareholders to be held in February 2022 (the "Proxy Statement"), which Proxy Statement will be filed with the SEC within 120 days after September 30, 2021, is incorporated herein by reference.

The Company has adopted a Code of Ethics that applies to all directors, officers and employees of the Company, including the Chief Executive Officer, Chief Financial Officer and Controller. The Company's Code of Ethics was filed as Exhibit 14 to the fiscal 2020 Form 10-K.

Item 11. Executive Compensation

The information set forth under the captions "Executive Compensation" and "Corporate Governance" in the Proxy Statement is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information set forth under the caption "Security Ownership of Certain Beneficial Owners and Management" in the Proxy Statement is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information set forth under the caption "Corporate Governance" in the Proxy Statement is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

The information set forth under the caption "Other Matters Regarding Independent Registered Public Accounting Firm" in the Proxy Statement is incorporated herein by reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules

The following documents are filed as part of this Report:

- (1) Consolidated Financial Statements:
 - Report of Independent Registered Public Accounting Firm
 - Consolidated Balance Sheets at September 30, 2021 and 2020
 - Consolidated Statements of Comprehensive Income for the years ended September 30, 2021 and 2020
 - Consolidated Statements of Shareholders' Equity for the years ended September 30, 2021 and 2020
 - Consolidated Statements of Cash Flows for the years ended September 30, 2021 and 2020
 - Notes to Consolidated Financial Statements
- (2) Exhibits
