

Digital Safety Content Report

July - December 2021	Child Sexual Exploitation & Abuse Imagery (CSEAI) - Hosted Consumer Services				CSEAI - Bing Search Engine	
	Content Actioned	Content Detected Proactively	Accounts Actioned	Accounts Reinstated	Content Actioned	Content Detected Proactively
	36,918	99.4%	11,805	0.04%	274,392	97.2%

Note: Data in this report represents July to December 2021 and is inclusive of all Microsoft consumer products and services (OneDrive, Outlook, Skype, Xbox, Bing, etc.) with the exception of LinkedIn and GitHub, which have distinct transparency reports. Not all CSEAI content that Microsoft took action on was associated with a specific Microsoft user account (e.g. Bing Search indexing). The total NCMEC CyberTip Reports for this period is 36,445.

July - December 2021	Terrorist & Violent Extremist Content (TVEC)			
	Content Actioned	Content Detected Proactively	Accounts Actioned	Accounts Reinstated
	2,001	98.7%	940	0.0%

Note: Data in this report represents July to December 2021 and is inclusive of all Microsoft hosted consumer products and services (OneDrive, Outlook, Skype, Xbox, etc) with the exception of LinkedIn and GitHub which have distinct transparency reports published.

July - December 2021	Non-Consensual Intimate Imagery (NCII)		
	Requests Reported	Requests Actioned	Percentage of Requests Actioned
	490	223	46%

Note: Data in this report represents July to December 2021 and are aggregated across Bing and Microsoft hosted consumer products for which a content removal request was received during this reporting period.
