Making FWD

WE ARE MAKING FWD BY PRODUCING LEANER

Our vision: We will continuously improve the environmental footprint of our products, operations and supply chain until they are in line with the needs of our planet.

reduced by 30%.

and collaborating
closely with our
key suppliers.

amongst our suppliers to reduce our consumption of water, chemicals and energy. Our supply chain is where we have the biggest environmental impact and therefore cooperation and transparency are vital to our success. Industry collaborations such as the Sustainable Apparel Coalition (SAC) help us to take a standardised approach, increase traceability of where our products' impacts are, evaluate our performance and improve our environmental management.

Aligning to the needs of our planet commits us to setting goals based on best available science. We will begin by setting a goal on greenhouse gases. As best available science and policies evolve, we will review and increase our ambition as needed.
