

Corporate Sustainability

Our commitment to sustainable development goes beyond our operating boundaries, as we continuously aim to add value to our stakeholders by advancing knowledge and improving lives.

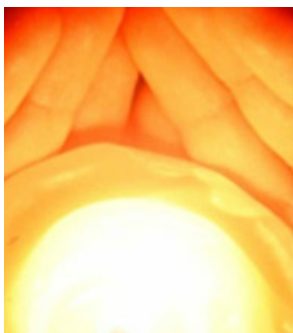

In This Section

- ▾ Corporate Sustainability
- Health Safety Environment

We seek internal and external perspectives to identify and help us better understand the risks and opportunities associated with new and emerging issues. The issues identified are evaluated for their relevance to Reliance and their impact on economic, environmental and social aspects. This exercise is performed annually to ensure its relevance to the changing business environment, and the disclosure through reports is aimed at our stakeholders like investors, customers, employees, JV partners, business partners and the community. We have worked with key stakeholders and focused our efforts towards our strategic pillars for sustainable development: energy management, environment, product stewardship, occupational health and safety, and social institution building.

Our Strategic Pillars, Trends and Stakeholder Needs

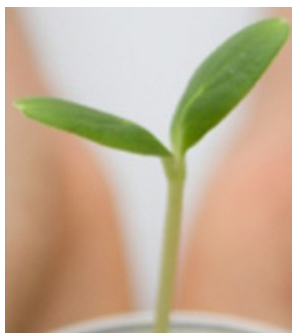

Our focus on the five strategic pillars ensures that we grow our business while responding to global trends and stakeholder needs. The key activities undertaken against each of the strategic pillars build on the progress we have already made in order to reduce our environmental impact, and contribute to society by investing in meaningful endeavours.

Energy Management

Environment Responsibility

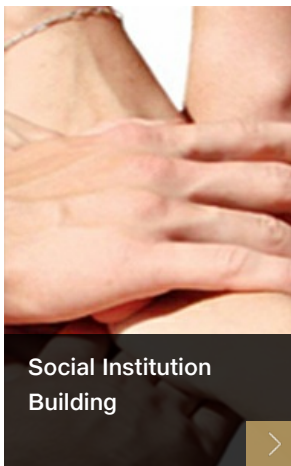

Product Stewardship

Occupational Health and Safety

From the CMD's Desk

Quotes At Reliance, business priorities co-exist with social commitments and our activities support inclusive growth. ”

Sustainability Reports

Reliance commenced reporting annually on its triple-bottom line performance from FY 2004-05. All its sustainability reports are externally assured and are GRI checked. The maiden report received 'in-accordance' status from GRI and all subsequent reports are 'GRI Checked A+' application level reports.
