Delta Secures License to Hydrogen Energy Technology from UK-listed Ceres to Develop its Fuel Cell and Electrolysis Solutions

TAIPEI, January 18, 2024 — Delta Electronics, Inc. (hereinafter referred to as “Delta”), a global leader in power and thermal management and provider of IoT-based Smart Green Solutions, today announced ...

ESG

Internal carbon pricing aligns with carbon reduction trends, empowering the achievement of Net Zero goals

Climate change has become a severe global challenge. Several international organizations openly state that implementing carbon pricing policies is one of the effective policy tools to reduce greenhouse gas emissions and limit global warming to 1.5°C. To actively realize its net-zero commitment, seize green business opportunities, and with the support of its management team, Delta formally implemented an internal carbon fee mechanism globally. This initiative drives support for five carbon reduction strategies to achieve net-zero.

Farewell to gasoline cars! Global electric vehicle sales surpass 10 million in 2022

Internationally, electric vehicle sales have also been setting new records year after year. According to the statistics from the International Energy Agency (IEA), over 10 million electric vehicles were sold globally last year, representing a 55% increase from 2021. The first quarter of this year has been even more inspiring, with over 2.3 million electric vehicles sold in just a few months.
