## Delta Secures License to Hydrogen Energy Technology from UK-listed Ceres to Develop its Fuel Cell and Electrolysis Solutions

TAIPEI, January 18, 2024 — Delta Electronics, Inc. (hereinafter referred to as “Delta”), a global leader in power and thermal management and p...

## ESG

### Delta's green products save 39.9 billion kWh electricity for net zero

The IPCC Sixth Assessment Report (IPCC AR6) pointed out that in the process of moving towards net zero energy transition, improving energy efficiency and using energy-saving equipment are important ways to help mitigate and adapt to climate change. Delta knows that if a company wants to achieve its carbon reduction goals, the first step is to start with energy saving. In addition to applying energy-saving technologies to its own carbon reduction, it also considers the carbon emissions caused by the use of sold products, continuously improves the energy efficiency of products, and launches various energy-saving solutions to help global customers save more energy and operating costs. Under the net zero goal, it can also help achieve the carbon reduction of Scope 3 value chain.

### Coral health check-ups with Micro CT by Delta and NMMBA

The Intergovernmental Panel on Climate Change (IPCC) warned that a 2 degree global temperature rise will cause massive extinction of coral reefs, affecting the ecosystem and human beings. How to restore corals is one of the global environmental protection priorities. The Delta Electronics Foundation has teamed up with the National Museum of Marine Biology and Aquarium (NMMBA) in developing adaptation research, and held
