About AESC UK.

At AESC UK we're proud to be part of the revolution in electrification and contribute directly to the sustainability and decarbonisation agenda both here in the UK and globally.

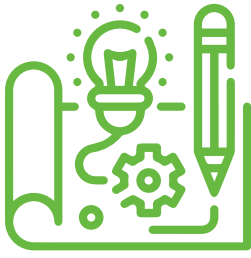

With a new Gigafactory (<https://envision-aesc.co.uk/about/what-we-do/our-plant/>) being built right here in the North of England (https://en.wikipedia.org/wiki/Northern_England) with an initial capacity of 12GWh, we are bringing over 1000 new jobs to the region, building on our proven track record of 11 years of battery production with ZERO critical incidents.

AESC is a Japan-headquartered global battery technology company dedicated to the research, development, design, manufacturing and sale of power batteries for electric vehicles (EVs) and energy storage systems. AESC has over 7,000 employees and 13 manufacturing sites across Japan, the U.S., the U.K., France, Spain and China.

Go Further with AESC UK.

Batteries play a huge part in the decarbonisation of the world, with all industries, including energy, construction and even our own homes evolving to become electrified.

At AESC UK we have over 10 years' experience in building batteries for both automotive and alternative sector clients and are about to launch production of our 5th generation battery in our new gigafactory, where we will deliver another UK first in manufacturing our own electrodes.

We can offer not only job security with our consistent growth, but the chance to work with cutting edge technology in a leading green tech environment. Now is the chance to grow with us, building on the knowledge of our unbeatable and experienced team.

Start your career journey today with a company that leads where others can only follow.
