

# Green Rankings 2012: Global Companies

by Newsweek | Oct 22, 2012 4:45 AM EDT

Our fourth annual environmental ranking of the 500 largest publicly traded companies in the world.

Here's a look at our environmental ranking of the biggest companies in developed and emerging world markets. Because a global ranking includes U.S. companies, some appear on both the [U.S. list](#) and the global list. The [Newsweek Green Rankings](#) cut through the green chatter and compare the actual environmental footprints, management (policies, programs, initiatives, controversies), and reporting practices of big companies. We teamed up with [two leading research organizations](#) to create the most comprehensive rankings available. View our [full methodology here](#).
