Co-founders, Anthony Todd and Martin Lueck, set out to create a research-led business where people would feel excited coming to work in the morning. This ambition stands true and has attracted a team of highly specialised but diverse talents, all dedicated to a collegiate style of working that values results above individual egos.

Non-Executive Director
Aspect reflects...

Razvan Remsing reflects on 
Albert Einstein

Einstein’s ability to question the status quo and imagine a new reality is an inspiration to me. I am in awe of Einstein’s imagination, creativity and ultimate practicality that allowed him to make huge strides in explaining the world around us. Spanning studies of the very small to the very large, his work on particle physics as well as that of special and general relativity in the early 20th century gave us a framework to understand the Universe. Empirical validation of his theory of relativity was only possible much later.
