WORKPLACE MONITORING REPORTS

FLA holds affiliated companies accountable for enforcement of its Workplace Code of Conduct in the factories, farms and facilities they use. FLA maintains a rigorous system for assessing working conditions, remedying violations, and verifying progress. [Independent External Assessors](#), working with FLA staff, randomly visit approximately five percent of facilities each year. Read our [case studies](#) to learn how these assessments uncover issues and result in improvements for workers.

More than 1,500 assessments have been conducted since 2002, and the results are posted below. Due to a recent system transition, some reports may not reflect the most recent remediation updates. [Click here](#) for guidance on how to read these reports. You can view results by Company, Year, or Country by using the "Filter by" tool.
