

MADE TO LAST CORPORATE RESPONSIBILITY

Responsibility and sustainability have always been at the heart of Clarks. From our beginnings, when a desire to prevent waste saw us craft our first pairs of shoes almost 200 hundred years ago, right through to present day, when we are working continuously to reduce our footprint.

Over 90% of our leather is sourced from Gold, Silver and Bronze rated tanneries

Our UNICEF partnership has diverted 1700 tonnes of shoes from landfill

We source renewable electricity for over 80% of our sites in Europe

PEOPLE

We have a strong tradition of supporting the communities in which we live and work, because we believe it's important everybody is treated as the individual they are.

[Discover how we're helping people everywhere](#)

PLANET

We recognise the environmental challenges our planet faces. That's why we think it's important for us to act on issues like climate change swiftly and innovatively.

POLICY

We are committed to acting on issues like climate change, sustainability and workers' rights. Our policies are here to guide us during every stage of that journey.
