Investment
Management

Two Sigma Investment Management aims to consistently generate alpha in liquid global markets across a range of conditions using a disciplined, scientific approach

What We Do

▶

Transforming investment management.

Our research methods, inspired by a diverse set of fields including artificial intelligence and distributed computing, are constantly advancing the bounds of our industry.

Research

Portfolio Construction

Risk Management

❝

We believe that using data and a technology platform, and trying to accumulate as much information as you can to make the best predictions and manage risk effectively, is the right way to go.

Carter Lyons,
Chief Business Officer,
Two Sigma

ALPHASTUDIO

AlphaStudio

We're looking to collaborate with the world's top data scientists on cutting-edge research ideas at the intersection of data science, technology and finance.
