Dear Natalja,

I must refer to our sustainability report, the information there regarding energy resources is the only one I have available.

We have identified sustainable materials as our top priority - now we have replaced almost all of our materials with LWG rated tanneries and 100% of our textile materials (in linings etc) are from GOTS certified cotton, 100% recycled polyester or Tencel. The LWG certification is based upon an environmental protocol, but in addition we will also start to measure more carefully to be able to be more exact. That is our next top priority.

I would very much like to see your MA thesis, it would be interesting.

Best regards,  
Anna
