

## Responsible Investing

Pendal is an investment manager with a proud 35-year heritage in and ongoing commitment to leadership in responsible investment (RI).

While we offer a range of innovative product solutions to meet client RI-related needs, as a fiduciary and corporate citizen, our approach seeks to embed RI practices across all of our active management practices.

We view effective management of our impact upon the environment, the community and other stakeholders as critical to our continued ability to deliver sustainable value to our clients, employees and our shareholders.

To meet our duties as a fiduciary we consider the impacts from environmental, social and governance (ESG) risks on the investments made on behalf of our clients.

Pendal has a Responsible Investments team dedicated to the implementation of RI practices across the business.

We also full own Regnan, a sustainable investment funds manager and advisory supports Pendal through research, engagement and advisory services. In 2020 Regnan launched two impact investment funds. [Find out more about Regnan here.](#)
